### DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Timothy Troy on 04/13/2009.

The application has been amended as follows:

In claim 1, line 14, insert "wherein R<sup>1</sup> is a hydrocarbon group free of aliphatic unsaturation and R<sup>2</sup> is selected from R<sup>1</sup> and alkenyl groups".

In the new claim 3, line 39, insert "wherein R<sup>1</sup> is a hydrocarbon group free of aliphatic unsaturation and R<sup>2</sup> is selected from R<sup>1</sup> and alkenyl groups".

In the new claim 4, line 1, delete "A method according to claim 4" and insert "A method according to claim 3".

### REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Though there are references that teach silicone coating compositions-including Zhu (US 6,509,423) and McGarry et al (US 6,660,395)- none anticipates or renders obvious the silicone coating composition comprising the first and second coating layers of the present claims.

Zhu, despite teaching a composition similar to those of the first and second coatings of the instant claim, does not teach or suggest a composition comprising two coating layers, wherein the molar ratio of the D units ( $R^2_2SiO_{2/2}$ ) to all other units combined, is higher in one of the layers compared to the other layer of the present claims.

McGarry et al, teaches a silicone matrix resin based composites comprising fibers impregnated with silicone matrix resin, and interleaved layers of tougher silicone resin. However, McGarry et al does not teach or suggest the first coating layer, comprising the silicone composition (X) and/or the second coating layer comprising the silicone composition (Y), wherein the molar ratio of the D units ( $R^2_2SiO_{2/2}$ ) to all other units combined, is higher in one of the layers compared to the other layer of the present claims.

The combination of Zhu and McGarry et al does not render obvious the above limitations of the present claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
